

WASHING TANK FOR BREAKS OF INDUSTRIAL VEHICLES AND LIKE

ABSTRACT

A washing tank (10) for brakes of industrial vehicles
5 and like, foresees a trolley (11), equipped with a
vessel (12) containing the washing liquid, and a
collection tank (14). Between the aforementioned vessel
(12) and the aforementioned collection tank (14) a
first pump (18) is foreseen which draws the washing
10 liquid from the aforementioned vessel (12) and through
a first pipe (19), conveys it into the collection tank
(14), and a second pump (17) which draws in the liquid
and puts it back into the aforementioned vessel (12),
through a second pipe (25).
